

BICYCLE HOLDERS

Our new frame holder for bicycle carriers is characterized by its high user-friendliness.

APPLICATION AREA

The bicycle can be fixed on the holder with just one grip. The shape of the frame holder resembles that of a hand. This ensures that the bicycle is already held in position when loaded onto the carrier. The ratchet system allows different frame sizes and shapes to be securely fixed. Soft rubber pads prevent damage to the bicycle. The bicycle holder can be locked, so it is secured against theft.

CONSTRUCTION AND COMPATIBILITY

The frame holder is provided as standard with a 26mm spigot and is suitable for mounting on a 30x2mm aluminium tube.

Customer-specific adaptations are however possible

TECHNICAL SPECIFICATIONS

- Diameter bicycle frame: 30 - 80 mm
- Diameter spigot: 26 mm
- Diameter of mounting tube: 30 mm
- Customer-specific adaptations possible
