

# Belt tensioner (tightener)

The new patented GUDO belt tensioner combines various advantages in one.

## APPLICATION AREA

It is very easy to install. Threading is not necessary as it can also be fitted at a later stage. It is therefore also suitable as a replacement for defective belt tensioners of other designs.

## CONSTRUCTION AND COMPATIBILITY

Its robust skeleton made of high-quality POM can withstand even extraordinary forces and impacts. The structure is filled with a soft material made of high-quality TPU. This not only results in high wearing comfort it also adds an attractive design.

## TECHNICAL SPECIFICATIONS

Belt width: max. 16 mm  
Belt thickness: max. 1.2 mm

the belt tensioner is available in different colours

**the belt tensioner in open position:**

**And closed:**
