

**SWOCK**

SMART AND STRONG

**Our Swock Arrow impresses with its simple and robust design. Its structure can be individually designed.**

**It is equipped with a flat base. The side bands are available in two different versions. There are also two adjustment wheel versions, with and without LED-light.**

#### **FIELD OF APPLICATION**

This fastener is used in the area of helmets, i.e. bicycle, burdock or ski helmets. Due to its robust construction it is also very popular for worker helmets.

#### **COMFORT**

The flat base, as well as the flexible side bands, ergonomically adapt to the head.

To further enhance comfort, additional padding is often added to the base.

#### **CONSTRUCTION AND COMPATIBILITY**

The lateral belts are available in different versions, which can also be designed especially for your application.

Different adjustment wheels in colour and design round off this closure in its diversity.

## EXECUTIONS AND CONFIGURATION

The Swock Arrow is available in two different versions of the sidebands and different adjustment wheel versions, such as LED-light equipped. Individual colour combinations can also be realised.

### 1 SWOCK ARROW **GSI** ADJUSTMENT RANGE 80/120mm
