SMALL SMART LIGHT

The Fine Line is Gudo's smallest screw cap. Its advantages are quickly explained:
Small, smart, light.

AREA OF APPLICATION

This fastener is used especially for helmets, where the design, the weight and the wearing comfort are in the foreground.

COMFORT

The soft base adapts to any head shape and usually requires no additional padding, thanks to its soft construction, usually requires no additional padding.

STRUCTURE AND COMPATIBILITY

The side hinges are constructed in two parts. The use is solved via a click system that defies high tensile forces. Nevertheless, the fastening is stable.

The soft strap section that comes into contact with the head is made from a very soft material that is comfortable to wear. This combination combines robustness with wearing comfort.

VERSIONS AND CONFIGURATIONS

The Fine Line is available in two different side band versions and various rotary knob variants, such as those fitted with LEDs. Individual color combinations can also be realized.
